

**DENVER PUBLIC SCHOOLS**

**REPORT OF DROPOUTS AND GRADUATES**

**2000-2001**

Prepared by  
Department of Planning and Research  
October 2001

## INTRODUCTION

Colorado Department of Education (CDE) rules require each school district to complete by July 15 an end-of-year (EOY) membership report that provides information on dropouts, graduates, active students, and withdrawals. This report provides information on dropouts and completers, based on data submitted to the Colorado Department of Education for the 2000-2001 school year.

A dropout is a student who leaves school prior to graduation and does not enroll in another educational institution during that school year. The dropout rate for a district, as defined by the Colorado Department of Education, is calculated by dividing the number of dropouts in grades 7 through 12 by all pupils in those grades who have been enrolled in the district at any time during the school year. This approach is commonly referred to as a one-year (or event) rate.

High school completers are divided into two groups: graduates and GED recipients. The completer's category includes GED recipients only. The graduate's category includes students who receive a traditional diploma.

Beginning with the 1990-1991 school year, Denver Public Schools reported graduation and completer rates using formulas developed by the Colorado Department of Education:

- **Regular schools:** the number of graduates or completers (graduates plus GED recipients and other completers) is divided by the adjusted grade 9 enrollment from four years earlier. Adjustments to this cohort's enrollment are made for incoming transfers, outgoing transfers, dropouts returning to the district, and dropouts whose records are requested by other school districts.
  
- **Alternative schools:** the number of graduates or completers is divided by the initial membership in grade 12, adjusted for incoming and outgoing transfers.

## DROPOUTS

In 2000-2001, the district had 1,403 dropouts, 265 fewer than the previous year, and a dropout rate of 4.2%, a decrease of 1.1%. (See Appendix A for more information about how dropout rates are calculated.) Table 1 shows dropout numbers and rates by ethnic group.

**Table 1: Dropout Numbers and Rates: 1999-2000 and 2000-2001**

| Group           | 1999-2000    |             | 2000-2001    |             | Difference |              |
|-----------------|--------------|-------------|--------------|-------------|------------|--------------|
|                 | Number       | Rate        | Number       | Rate        | Number     | Rate         |
| American Indian | 26           | 6.1%        | 27           | 6.1%        | 1          | 0.0%         |
| Black           | 298          | 4.3%        | 334          | 4.6%        | 36         | 0.3%         |
| Asian           | 51           | 4.3%        | 34           | 2.9%        | 17         | -1.4%        |
| Hispanic        | 1,020        | 6.9%        | 775          | 4.8%        | 245        | -2.1%        |
| White           | 273          | 3.3%        | 233          | 3.0%        | 40         | -0.3%        |
| <b>Total</b>    | <b>1,668</b> | <b>5.3%</b> | <b>1,403</b> | <b>4.2%</b> | <b>265</b> | <b>-1.1%</b> |

Compared to 1999-2000, the 2000-2001 dropout rates for Asians, Whites and Hispanics decreased, while the dropout rate for American Indians remained the same the rate increased for Blacks. Dropout numbers and rates by level, ethnicity, and gender are shown in Table 2 (attached).

Table 3 below compares the percentage of dropouts by ethnic group with the group's percentage in the membership.

| <b>Group</b>    | <b>EOY Pupil Membership</b> | <b>Dropout</b> | <b>Difference</b> |
|-----------------|-----------------------------|----------------|-------------------|
| American Indian | 1.3%                        | 1.9%           | 0.6%              |
| Black           | 22.0%                       | 23.8%          | 1.8%              |
| Asian           | 3.5%                        | 2.4%           | -1.1%             |
| Hispanic        | 49.4%                       | 55.3%          | 5.9%              |
| White           | 23.8%                       | 16.6%          | -7.2%             |

Table 3 illustrates that in 2000-2001 the dropout percentages for Asians and Whites are lower than their percentages in the pupil membership. American Indians, Hispanics and Blacks have higher percentages of dropouts than their percentages in the membership.

The dropout rate for each middle and high school was calculated using the Colorado Department of Education formula, which counts pupils in the membership base in each school and grade in which they are enrolled during the year. This frequently results in pupils being counted in more than one base population. Therefore, caution should be used in interpreting these rates as they can vary significantly with changes in the number of within-district transfers and grade retentions /reclassifications, as well as with changes in the number of dropouts.

The 2000-2001 middle school average dropout rate of 1.8% (208 students) is comparable to the previous school year's dropout rate of 1.2% (141 students).

The schools for at-risk students reported the highest rates for middle schools, PS1 middle school (7.1%), ACE\Community Challenge (5.7%) and F. Crittenton (25.0%) when compared to an average middle school rate of 1.8%.

Among the traditional middle schools, Lake, Gove, Cole, and King respectively, reported the highest dropout rates for the middle school level. Lake middle school reported a dropout rate of 3.6% for this year, an increase of .3% from last year's rate of 3.3%. Gove middle school recorded a rate of 6.2%, an increase of 5.3% from the previous year's 0.9% rate. Cole reported a 4.5% dropout rate, an increase of 4.5% over last year's 0.0%, and King reported a 3.2% dropout rate, an increase of 2.0% over last years 1.2%.

Overall, six traditional middle schools experienced decreases in their dropout rates for this year: Henry (0.7%), Skinner (1.4%), Baker (1.1%), Grant (.1%), Morey (1.5%), Place (0.3%). Of all schools, Morey had the largest decrease (1.5%), while Gove recorded the highest increase (5.3%). The dropout rates for each middle and high school can be found in Tables 4 and 5 (attached).

This school year's high school average dropout rate of 5.5% shows a decrease of 2.0% when compared to last year's rate of 7.5%.

High school rates were highest at those schools specifically designed for at-risk students. Of these schools, GED School, Emily Griffith Opportunity School, and Florence Crittenton reported significantly higher dropout rates when compared to an average rate of 5.5% for all high schools. Among these schools: GED School reported a rate of 22.3% (a 6.2% decrease in dropout rate when compared to the previous year's rate of 28.5%). Emily Griffith Opportunity School reported a rate of 9.9% (a 13.8% decrease in dropout rate when compared to the previous year's rate of 23.7%). Florence Crittenton's dropout rate of 23.9% reveals a 7.0% increase in dropouts when compared to last year's dropout rate of 16.9%. See attachment 1 for a description of each of these schools.

In sum, many alternative high schools increased in dropout rates: Fred N. Thomas Career Ed Center (3.0%), Florence Crittenton (7.0%) and P.S. 1 Charter (4.0%); whereas, seven schools decreased their rates: CLA High School (1.2%), GED School (6.2%), DPS Night High School (7.5%), Emerson Street School (0.6%), Emily Griffith (13.8%), and Denver School of the Arts (0.2%). Of all the alternative schools, Florence Crittenton had the highest increase in dropout rate (7.0%), and Emily Griffith High School showed the largest decrease in dropout rate (13.8%).

Among the traditional high schools, Montbello, Manual, and West reported the highest dropout rates of traditional high schools. Montbello reported a dropout rate of 6.5% (a increase of 1.2% from last year's rate of 5.3%). Manual reported a dropout rate of 9.5% (a increase of 2.4% from the previous year's 7.1% rate). And, West reported a 5.9% dropout rate for the school year (a decrease of 2.9% from the previous year's rate of 8.8%). Overall, rates were lowest at Thomas Jefferson (1.7%), and J.F. Kennedy (1.5%).

In sum, many traditional high schools showed decreases in their dropout rates: Abraham Lincoln (1.2%), North (1.5%), South (0.4%), Thomas Jefferson (1.3%), and West (2.9%). In contrast, five high schools increased dropout rates: East (0.7%), George Washington (1.3%), JFK (0.3%), Manual (2.4%), and Montbello (1.2%). Of all traditional high schools West had the largest decrease of 2.9% while Manual recorded the largest increase of 2.4%. The dropout rates for each middle and high school can be found in Tables 4 and 5 (attached).

## **Attachment 1**

Florence Crittenton is a school for pregnant teen-agers and teen-aged parents. It offers a comprehensive program of classes in academic subjects, parenting, and job-readiness. Nursing, counseling, and on-site day care services are also provided.

The Contemporary Learning Academy is organized around a block schedule where pupils study three subjects intensively for nine weeks. Students enrolled continuously for the full school year may receive credit for 12 courses - the same number normally completed by students in a regular high school. Students choosing not to attend a nine-week session or pupils withdrawing prior to completion of a session are counted as dropouts unless they enroll in another educational program during the school year.

The Opportunity School rate includes both pupils in Second Chance, a program designed for at-risk students, and other pupils under age 21 without a diploma who enroll only in a vocational class. These students, regardless of whether they successfully complete the class, are counted as dropouts if they withdraw and do not enroll in another school. Students enrolled in the GED program are also included.

GED is a program that provides an alternative for students who lack sufficient high school credit for a traditional diploma and want to earn a General Equivalency Diploma (GED). The curriculum is designed to prepare students to pass the GED test.

Night High School is designed as a transition program for high school students who are not attending school due to attendance or behavior problems. The course work is taught based upon Denver Public School standards. The school does not award diplomas; students are expected to return to their resident school for graduation and other appropriate educational placement.

## GRADUATES

For the 2000-2001 school year, the district had 2,802 completers including 2,585 graduates and 217 students who earned Graduate Equivalency Diplomas (GED). Table 6 presents graduate and completer information for 1999-2000 and 2000-2001. Membership percentages by ethnic group for 2000-2001 high school students are provided for the purpose of comparison.

**Table 6: Completers: 1999-2000 and 2000-2001**

| Group           | Completers<br>1999-2000 |            | Completers<br>2000-2001 |              | 2000-2001<br>High School<br>Membership |
|-----------------|-------------------------|------------|-------------------------|--------------|----------------------------------------|
|                 | Number                  | Percent    | Number                  | Percent      | Percent                                |
| American Indian | 37                      | 1.2        | 34                      | 1.2          | 1.2                                    |
| Black           | 658                     | 22.2       | 608                     | 21.6         | 22.5                                   |
| Asian           | 152                     | 5.1        | 144                     | 5.1          | 3.9                                    |
| Hispanic        | 1,100                   | 37.1       | 1,045                   | 37.2         | 45.5                                   |
| White           | 1,021                   | 34.4       | 971                     | 34.6         | 26.7                                   |
| <b>Total</b>    | <b>2,968</b>            | <b>100</b> | <b>2,802</b>            | <b>100.0</b> | <b>100.0</b>                           |
| Male            | 1,367                   | 46.1       | 1,327                   | 47.4         | 50.8                                   |
| Female          | 1,601                   | 53.9       | 1,475                   | 52.6         | 49.2                                   |

Beginning with 1990-1991, graduation and completer rates have been calculated in accordance with the Colorado Department of Education (CDE) formula. The rate for 2000-2001 reflects the cohort beginning with 1997-1998 ninth grade students. For the district, the graduation rate was 64.5%, and the completer rate was 69.9%. Table 7, on the following page, provides the graduation and completer rates for each ethnic group for 2000-2001. Table 8, which is attached, provides comparable information about earlier years.

**Table 7: Graduation and Completer Rates for 2000-2001**

| Group                  | Graduates    |              | Completers   |              |
|------------------------|--------------|--------------|--------------|--------------|
|                        | Number       | CDE Rate *   | Number       | CDE Rate *   |
| American Indian        | 31           | 64.6%        | 34           | 70.8%        |
| Black                  | 555          | 62.6%        | 608          | 68.6%        |
| Asian                  | 139          | 77.2%        | 144          | 80.0%        |
| Hispanic               | 944          | 54.6%        | 1,045        | 60.5%        |
| White                  | 916          | 78.6%        | 971          | 83.3%        |
| <b>District Totals</b> | <b>2,585</b> | <b>64.5%</b> | <b>2,802</b> | <b>69.9%</b> |
| Male                   | 1,212        | 59.5%        | 1,327        | 65.1%        |
| Female                 | 1,373        | 69.7%        | 1,475        | 74.9%        |

\* See Appendix B for Graduation and Completer Rate Formulas.

Table 9 (attached) provides information on graduates and graduation rates at each high school. Table 10 (attached) provides comparable information about completers.

Of the traditional high schools, four schools showed improved graduation & completion rates: J.F. Kennedy (1.5% graduation and completion), East (4.7% graduation and completion), Manual (1.9% graduation and completion) and North (4.3% graduation and completion). J.F. Kennedy had the highest graduation rate of 80.8% and completer rate of 80.8%. Montbello, West, and Abraham Lincoln had the lowest graduation and completer rates of 60.2%, 51.1%, and 50.6%, respectively. Meanwhile, East reported the greatest improvement of all high schools, going from 75.6% for last year to 80.3% this year, a gain of 4.7%.

Caution must be exercised when comparing the number of graduates in different districts as the graduation requirements established by local school boards may vary, many do not require pupils to complete as many credits as required by the Denver Public Schools.

The graduation and completer rates are conservative estimates of the true graduation rate because no adjustment is made for twelfth grade dropouts who return to school or other dropouts who complete their education as adults.

**DROPOUTS RETURNING TO SCHOOL**

An often-overlooked component of the dropout issue is that many dropouts do return to school to complete their education. For the purpose of calculating graduation and completer rates, the Colorado Department of Education calls these students **adjustments** and categorizes them as follows: A) a dropout student whose records were requested from another educational program, B) a dropout student who received a high school diploma or GED from another educational agency, C) a dropout student who reentered an educational program within the district, D) an expelled student whose records were requested from another district, E) an expelled student who received a high school diploma or GED from another educational agency, and F) an expelled student who reentered an educational program within the district. It is important to note that some dropouts who return to school to finish their education drop out again. Table 11 (below) shows adjustments by ethnic group, gender, and adjustment type.

**Table 11: Adjustments by Type and Ethnicity for the Class of 2001**

| Group           | Adjustment Type |    |     |    |    |    | Total      |
|-----------------|-----------------|----|-----|----|----|----|------------|
|                 | A*              | B* | C*  | D* | E* | F* |            |
| American Indian | 1               | 4  | 4   | 0  | 1  | 0  | <b>10</b>  |
| Black           | 9               | 21 | 42  | 4  | 5  | 22 | <b>103</b> |
| Asian           | 0               | 2  | 9   | 1  | 1  | 1  | <b>14</b>  |
| Hispanic        | 24              | 39 | 119 | 6  | 1  | 21 | <b>210</b> |
| White           | 4               | 20 | 24  | 2  | 1  | 3  | <b>54</b>  |
| <b>Total</b>    | 38              | 86 | 198 | 13 | 9  | 47 | <b>391</b> |
| Male            | 24              | 43 | 103 | 13 | 8  | 39 | <b>230</b> |
| Female          | 14              | 43 | 95  | 0  | 1  | 8  | <b>161</b> |

\* Adjustment type: dropouts: **A)** records requested, **B)** received diploma or GED, **C)** returned to district  
 expulsions: **D)** records requested, **E)** received diploma or GED, **F)** returned to district

Table 11 shows that 322 dropouts and 69 expulsions from the class of 2001 earned a diploma or GED, returned to another school district or program to complete their education, or returned to the Denver Public Schools. These students may have been dropouts in grades 9,10, or 11. The majority of adjustments were for Hispanic students, who also comprised the largest number of dropouts.

## APPENDIX A

### **How are dropout rates calculated?**

A dropout rate is calculated by dividing the number of discontinuers by the aggregate number of pupils; for example, if a school has 50 dropouts and 500 students, the rate would be ten percent (50 divided by 500). The aggregate or base number of pupils for a year includes students who

- graduate during the year
- actively attend school
- drop out
- enroll or withdraw during the school year.

Generally, any pupil who has been included in the membership during the reporting period is included in the aggregate pupil count.

### **How can different dropout rates be calculated for the same population?**

Rates will vary if different definitions are used to identify dropouts or determine the aggregate number of students. For example, in 1985-1986, Colorado had an official dropout rate of 5.2%. In 1987-1988, the rate fell to 4.1% because grades 7, 8, and 9 were added, and very few students drop out in grades 7 and 8. Also, as described below, rates can be calculated for one or multiple years.

### **What is the difference between one-year and longitudinal dropout rates?**

One of the most common reasons for differences in dropout rates is that some rates are calculated for only one year while others accumulate the number of dropouts over multiple years. The latter approach is referred to as a **longitudinal** or **cohort rate**. The example below illustrates how the two approaches can result in very different dropout rates.

|                           | <u>Membership</u> | <u>Dropouts</u> | <u>Rate</u>       |
|---------------------------|-------------------|-----------------|-------------------|
| <b>Yearly Rate:</b>       |                   |                 |                   |
| YEAR X                    | 100               | 10              | $10/100 = 10.0\%$ |
| YEAR X + 1                | (100-10) 90       | 9               | $9/90 = 10.0\%$   |
| YEAR X + 2                | (90-9) 81         | 8               | $8/81 = 9.9\%$    |
| YEAR X + 3                | (81-8) 73         | 7               | $7/73 = 9.6\%$    |
| <b>Longitudinal Rate:</b> |                   |                 |                   |
| 4 Years Combined          | 100               | 34              | $34/100 = 34.0\%$ |

The longitudinal rate is higher than the yearly rates since the number of dropouts accumulates over a longer period. However, the longitudinal rate usually corrects for situations where students discontinue in more than one year since a pupil's last status is used to compute the dropout rate.

### **How are the official Colorado Department of Education (CDE) dropout rates calculated?**

The CDE dropout rate is a single-year measure for a district that includes in the base count all students who were enrolled at any time during the reporting period. Pupils are counted as dropouts only once, using their status at the end of the year, regardless of the number of times they enter, withdraw, or drop out. Students can, however, be counted as a dropout in more than one reporting period.

For dropout rates at individual schools as compared to the district rate, there is a significant difference in the method of calculation. While dropouts are counted only once, the base count in a school and grade includes all pupils who were in that school and grade at any time during the year. Therefore, pupils who are reclassified to a different grade or who transfer to another school are counted in the base of more than one school or grade. Since this duplication increases the base, dropout rates are generally lower for individual schools than for a district. CDE dropout rates for schools are difficult to interpret because so many factors other than changes in the number of dropouts can affect the rate.

Caution should be used when comparing CDE dropout rates for different years because the number of grades, reporting periods, and method of counting pupils enrolled in alternative schools have changed. The current CDE approach includes all pupils in grades 7 through 12 and uses July 1 to June 30 as the reporting period.

## APPENDIX B

### GRADUATION AND COMPLETER RATE FORMULAS

#### Regular High Schools

For 2000-2001, the graduation rate uses the ninth grade class in 1997-1998 as a base. Graduation and completer rates are nearly identical except that in calculating the graduation rate, pupils earning a GED, a Certificate of Attendance, or a Special Education Certificate are not included among the graduates but are counted in the base membership. Therefore, the graduation rate will always be lower than or equal to the completer rate.

Adjustments to the initial membership base are made each year to reflect pupils entering or leaving the class for reasons other than dropping out. Adjustments are also made for dropouts who return to the district, dropouts whose records are requested by other educational institutions, and dropouts who earn a GED. The following is a summary of the adjustments made to the initial membership base in order to compute the graduation rate for each regular high school.

Initial Membership Base (the 9th grade class in 1997-1998)

+ Incoming transfers from within Denver Public Schools:

- from other schools
- from other grades

+ Incoming transfers from outside of the Denver Public Schools:

- pupils entering from other school districts
- dropouts returning to school (retrievals)

- Outgoing transfers within the district:

- to other schools
- to other grades
- dropouts reentering other schools and grades (retrievals)

- Outgoing transfers to other districts:

- pupils transferring to other school districts
- dropouts for whom records are requested by other school districts

\* Dropout rates are not available for CLA Middle School during the 1995-1996 school year.

\* Dropout rates for CLA Middle School during the 1998-1999 school year are combined with CLA High School.

- dropouts earning a GED

These adjustments are made for each year (grades 10-12) of a particular cohort. For the class graduating in 2000-01, adjustments were made to the 10th grade class in 1998-1999 and the 11th grade class in 1999-2000. However, for the 12th grade class in 2000-2001, the adjustments do not include 12th grade dropouts returning to the Denver Public Schools or entering other school districts the following year. The graduation (or completer) rate is the number of graduates (or completers) divided by the adjusted membership as explained above.

### Alternative Schools

Graduation and completer rates are calculated in a similar manner for alternative schools except that the 12th grade class in 2000-2001 is used as a base. A summary of the adjustments is provided below.

Initial Membership Base (the 12th grade class in 2000-2001) adjusted as follows:

+ Incoming transfers from within Denver Public Schools:

- from other schools
- from other grades

+ Incoming transfers from outside of the Denver Public Schools:

- pupils entering from other school districts
- dropouts returning to school

- Outgoing transfers within the district:

- to other schools
- to other grades

- Outgoing transfers to other districts:

- pupils transferring to other school districts

Again for 12<sup>th</sup> grade dropouts returning to the Denver Public Schools the following year, no adjustment is made. The graduation (or completer) rate is the number of graduates (or completers) divided by the adjusted membership count as explained above.

\*MYECs were renamed the Alternative High School in 1992-1993, and Contemporary Learning Academy in 1994-95, when the format of the educational program was changed. Alternative High School designates the DPS GED program beginning with the 1998-99 school year.

\*\*Formerly Alternative Transition High School

\*MYECs were renamed the Alternative High School in 1992-1993, and Contemporary Learning Academy in 1994-95, when the format of the educational program was changed. Alternative High School designates the DPS GED program beginning with the 1998-99 school year.

\*\*Formerly Alternative Transition High School

\*High School Redirection closed at the end of the 1991-1992 school year.
